Simple, Effective and Targeted
The LMA® MADomizer® Device from Teleflex is a bottle atomizer that allows for simple, effective and targeted topical medication delivery. The MADomizer® Device allows for exact dosing and fast, targeted delivery of topical anesthetics and vasoconstrictors to the mucosal surface of the paranasal sinuses.

Reduces the Risk of Cross-Contamination
Unlike traditional Venturi atomizers, the MADomizer® Device has a positive displacement pump and a one-way valve that ensures unidirectional flow. This innovative feature, when combined with the disposable tip, reduces the risk of cross-contamination. 1, 2

Reliable, Flexible and Portable
The MADomizer® Device has no parts to clean, does not clog, and allows for approximately 200 pumps per full bottle. The simple, easy to use device has a malleable disposable cannula, which allows for use with patients in any position. The device is portable, fitting on ENT carts and in consult bags, is individually packaged, and does not need noisy compressed air.

Customizable
The MADomizer® Device can provide targeted, customized treatment based on the needs of the patient.

BENEFITS
The Clinician
Allows for exact dosing, is simple and easy to use.

Your Institution
Design reduces the risk of cross-contamination.

The Patient
Customizable to the individual needs of each patient.
